

Let's get serious about  
rising energy costs.  
Eliminate Power Bills.  
**Fight Back.**

# For Investors... Invision Homes now include the Mérïdien Energy™ Home PowerStation as standard in all our new homes.

INVISION  
HOMES

Thanks to new government solar and battery incentives, it's now possible to include a 7.92kW Solar + XXL 21.6kWh Battery system, valued at \$21,500, in your new investment home.

This system is big. Big enough Power to ZERO your tenant's energy bills and boost your investment returns.

- Power your tenant's energy bills to ZERO†
- With ZERO power bills, and no more 'bill shocks', happy tenants will pay more rent
- Uplift rental income by \$25-\$30+ or more per week\*
- Faster leasing, longer tenancies
- Maximise Tax Benefits with extra depreciation
- Increase rental and resale appeal and value

Now a standard inclusion in your new Invision Homes property with the help of generous Government incentives.

# Tasty power bills? Yeah. Nah. Get the Power to ZERO energy bills. Fight Back.

Mérédien Energy™ have engineered our Home PowerStation systems to optimise performance across multiple operating levels to Power energy bills to ZERO\*.

With more solar production, and XXL storage, combined with VPP Energy Sharing programs, the results are impressive:

- ZERO\* cost energy when rates are high.
- Generate bill offsets and income via energy sharing at peak times.

We focus on getting more \$\$\$ from your Home PowerStation. This is the pathway for Power to ZERO\*.

## How it Works

- 1 Some of the solar power is used to run the home during the day.**
  - ZERO\* Cost Energy
  - Power on when the power is off
  - Can be used for EV Charging
- 2 Some of the solar power is used to charge the battery.**
  - Your solar energy is stored to be used later.
- 3 Stored solar power is used to run the home when there is no solar production.**
  - ZERO\* Cost Energy | BIG savings on peak energy prices
  - Power on when the power is off
  - Can be used for EV charging

- 4 Stored energy can be shared via VPP Energy Sharing partnerships.**
  - Income producing energy
  - Program access fees
- 5 Surplus solar can be exported to the grid**
  - Income producing energy

Mérédien Energy™ design Home Power Station systems to deliver more bang for your energy buck.

Mérédien Energy™  
Home PowerStation

**BIG 7.92kW Solar  
+ XXL 21.6kWh Battery**

Produces an average 34kWh  
of clean energy per day

# Eating power bills is one way to make them go away. We have a better idea. **Fight Back.**

## Your new home has the Power to ZERO your energy bills.

Méridien Energy™ are leaders in renewable energy for new homes and have been developing programs for tenants to tap into the benefits of solar. Thanks to generous government incentives, we can now provide meaningful solutions for tenants.

Your new home includes Méridien Energy™ Home PowerStation with big 7.92kW Solar and XXL 21.6kWh Battery. It delivers more than enough Power to ZERO your energy bills.

- Power energy bills to ZERO\*
- No more Bill Shock
- Backup power when the power goes off
- No lock in energy retailer – the power of choice

## You can save \$50, \$60 or more per week.

Sign up with Diamond Energy Wattbank VPP and participate in the energy sharing program that provides an extra \$450 p.a. credit plus \$\$\$ from battery energy sharing. It's another level of benefits that takes the pain of energy bills away.

Click the links on the right, to connect to more savings.

With cost of living constantly rising, it's nice to get a break.

## Enjoy the Power of ZERO Energy Bills.

**The Meridien™ Energy Team**

### How you can make the most out of the **Méridien Energy™ Home PowerStation**

**Sign up with Diamond Energy Wattbank VPP**

**Use energy hungry appliances during the day**

Use your washing machines, dryers, dishwashers, irons and vacuums when the sun is shining.

**Pre-set air conditioning for the afternoon**

Ceiling fans and the thermostat will efficiently keep things cool in summer and warm in winter once the sun goes down.

**Be energy smart**

- Turn off lights when leaving a room
- Turn appliances off at the wall
- Minimise dryer use
- Choose fans over air-con
- Wash clothes in cold water
- Leave plenty of space around your fridge
- Cover pots and pans to reduce cooking time
- Keep showers under 4 minutes
